TAPAS NEWSLETTER

Issue no.4

“Tools for Assessment and Planning of Aquaculture Sustainability ([TAPAS](#)) is a four-year EU Horizon 2020 collaborative research project. TAPAS is evaluating current aquaculture regulatory practices, methods, tools and technologies used for implementation, to identify gaps, needs, bottlenecks and propose improved approaches. The overall objective is to establish a comprehensive ‘toolbox’ to support transparent and efficient licensing, that will enhance environment sustainability, aquatic food security and blue growth.” [Read more...](#)

Greek Case Study

New tool development by HCMR

The Hellenic Center for Marine Research (HCMR) conducted their first TAPAS experiment in Vourlias bay, Greece using a HCMR research vessel, a dinghy and an auto-mobile laboratory. The second sampling campaign will start next year, samples will be collected from the water column and sediment for subsequent analysis. [Read more...](#)

Fish cage inspection with AUV

Fish escapes can be reduced to a minimum with the Autonomous Underwater Vehicle (AUV), which has been developed by the Hellenic Centre for Marine Research (HCMR). [Read more...](#)
